

My Container..

by: Katja

I think that my container is good because:

1. It can not tear apart, because it is made out of fleece.
2. It can not be dented, because it is made out of a sturdy fabric.
3. It can not break, because fabric can't break apart.
4. It has cords to be closed and handles so I can carry it.

My container is an adorable orange polar-fleece bag. Here's how to make it:

1. Cut out a rectangular piece of fabric.
2. Fold it and sew the two sides together.

3. Punch holes along the open end. (let an adult do it!)

4. Twist two strings of yarn together to make a cord. - You need two cords!

5. Pull the first cord through the punched holes and tie the ends together.

6. Pull the other cord through the punched holes from the opposite direction. Again, tie the ends together.

Note: It takes about an hour to make this draw-string bag.
