

Art Critic

Last week we went to the Kunsthaus to inquire into visual art.

Our learning **goal** is to develop and share your understanding about how the **the arts use signs and symbols - unique strategies - to make meaning and evoke an individual response.**

Role: You are an art critic, an expert in visual arts.

Audience: You will be sharing your critiques with your peers during an art exhibition.

Situation: You are at an art exhibition critiquing pieces of art.

Product: Your product is a critique of an artwork of your choice. You will be asked to display this at the exhibition.

Description of the piece: This picture shows a school in Frankfurt but as you can see this school is not so normal.

My response: This building is a really cool abstract and it also has a good influence on nature. This building is unique and one of a kind. This building makes me feel wild but with a lot of care for nature. For me the two domes represent the sun and the moon and all in all this building is cool and nice.
