

Deforestation

By Safiah

Why is Deforestation happening

There is a growing number of people in the world that means more food is needed.

Therefore more forests are destroyed to make way for farming

Also, People need wood to make Furniture, Houses and many more everyday things

Deforestation causes

There are many causes of deforestation i will be listing some.

- To make more land available for housing and urbanization
- To make room for cattle ranching
- To harvest timber to create such as paper or furniture
- To create ingredients

Deforestation effects

- Loss of species
- A lot of animals live in forests which are their habitats. And that's why the animals are dying out.
- Water cycle
- Tree's are important to the water cycle they absorb water rainfall and produce water vapor.

Why is deforestation such an important matter?

When forests are cleared, the land and soil becomes exposed to the weather.

The animals die out because the forests are destroyed

Increased chances of flooding also becomes a problem with Deforestation

What can we do to help?

People can do a lot of things to help stop deforestation so please try and follow some of these steps to help us save the tree's

- Use recycled items
- Stop using palm oil
- Plant trees when you cut down one
- Stop wasting natural resources
- Re-use items

Thank you for watching
