

Which organisations are working to tackle inequality in your example?

ENAR(European Network Against Racism)

They works to put an end to racism and inequality in europe.

OAR(Organisation Against Racism)

They try to delete the racist past and put an end to racism and put something good in its place.

Explain the concept of equality

Equality is when everybody gets the same rights and is treated fairly and evenly.No matter how they are. Even if they are different.

In which ways does your picture show

inequality? (For example: Which needs aren't being met? What rights aren't being upheld?)

The green fish is not treated fairly by the other fish just because he is different. Every fish is staring at him not respecting his right to privacy. They are racist because they are not treating him fair because of skin color. They won't play with him or do other stuff.

How does the picture make you feel?

It makes me wonder why we can't just live in peace and respect each other. I don't get why people discriminate others if they don't get a good output
